

DANIEL SIMIOLUWA, BABATUNDE

(+234) 8101078140 | Lagos State, Nigeria

similoluwababatunde@gmail.com

EDUCATION

Federal University of Agriculture, Abeokuta, Nigeria

Jan 2021- Aug 2024

B.Sc. Computer Science (Second-Class Lower)

The Polytechnic, Ibadan, Nigeria

Feb 2018-Dec 2019

ND. Computer Science (Lower Credit)

WORK, TEACHING AND RESEARCH EXPERIENCE

Software Developer (Frontend Web Developer) – NYSC Intern

Canary Point Holdings

- Architected and refactored reusable component systems for scalable frontend development
- Built component-driven interfaces using React and Next.js
- Implemented form validation, resolved UI and performance issues
- Collaborated using Git (branching, pull requests, resolving merge conflicts)

Industrial Training (Student Industrial Work Experience Scheme (SIWES))

GIIT AFRICA

- Taught basic programming concepts to junior interns and providing troubleshooting support.

Undergraduate Research - Development of a Password Management System

- Conducted research on password security protocols and cryptographic techniques.
- Developed a secure password manager, integrating hashing and encryption methods.
- Designed an intuitive user interface with multi-factor authentication support.

Undergraduate Research – Development of a Visitor Management System

- Developed a web-based visitor management system to streamline visitor check-ins and check-outs.
- Implemented real-time data logging and tracking features for improved security and efficiency.
- Designed an intuitive UI for easy visitor registration and record management

PROJECTS

Secure Password Manager

- Developed a web-based password manager using the MERN stack.
- Implemented AES encryption and hashing for secure credential storage.
- Integrated multi-factor authentication (MFA) for enhanced security.
- [Github](#)

Task Manager

- Developed a task management web application using MERN stack.
- Implemented CRUD functionalities for task creation, editing and deletion.
- [Github](#)

Weather App

- Built a weather forecasting application using React and OpenWeather API.
- Designed an interactive UI to display real-time weather data for multiple locations.
- Implemented changes based on weather conditions.
- [Github](#)

Visitor Management System

- Designed and developed a web-based visitor management system for tracking visitor check-ins and check-outs.
- Implemented real-time data logging, user authentication, and administrative controls.
- Focused on improving security and efficiency in visitor record management.

VOLUNTEERING AND LEADERSHIP EXPERIENCE

Public Relations Officer, National Association of Computing Students (Federal University of Agriculture, Abeokuta Chapter).

- Managed public communications and social media outreach for the organization.
- Coordinated events, workshops, and technology seminars for students.

Volunteer, Pro-Active Youth Empowerment (PAYE), Ogun State, Nigeria.

- Assisted in organizing leadership training, skill acquisition, and empowerment programs for youth development.
- Supported initiatives focused on career growth, entrepreneurship, and social changes.

Volunteer, Junior Chambers International, Nigeria (JCIN) – NYSC Chapter

- Assisted in the planning and execution of community development projects.
- Supported and coordinated workshops that were aimed at educating the public

ACHIEVEMENTS/AWARDS

- Second Class Lower (2021-2024), Federal University of Agriculture, Abeokuta, Nigeria.

SKILLS AND INTERESTS

- **Languages:** JavaScript, TypeScript
- **Frameworks/Libraries:** React, Next.js, Node.js
- **Styling:** Tailwind CSS, shadcn/ui
- **Tools:** Git, GitHub, VS Code
